& Light Temples  
(private & group)

*The Odyssey Sound & Light Ascension Temples are the first Energy Enhancement Environments created to be an open-ended environment designed to explore frontiers on the leading edge of consciousness research. These advanced meditation/ascension rooms were created to be a magical place, a space where you can get in touch with the unlimited energy of your essence -- to reconnect you to the sense of wonder and aliveness you experienced as a child. It can take you to worlds of magic and freedom where all things are possible. These trans-dimensional realities are within each one of us and just await our sincere intent to experience and learn from them.*

My name is JoAnn Chambers and my spiritual name is Shivanti. I am a shamanic sound healer and a clairvoyant. I have been working with clients in private practice since 1985, beginning with a massage/body-work practice with emphasis on emotional release therapy. I also read chakras and auric patterns in a persons field, as well as I have the ability to see core level pastlife imprints. I am a shamanic traveler and have ventured into alternate realities since I was a child. I can see into many dimensional realms to assist my clients in discovering their deeper truths on their healing journey. I offer my gifts to those who are walking a serious spiritual path of Light. I have maintained an internet based practice since 1994 and have helped thousands of people online find direction and guidance as they walk their journey of enlightenment. I am available to assist those walking a conscious path of ascension into the 5th World of Light.

All my readings and healing sessions are supported in various ways by the multidimensional music of ShapeshifterDNA. Along with my husband Gary, we have been creating these transformational soundscapes over 26 years now. These transmissions of pure intentionally-guided frequencies that facilitate my work in ways that accelerate the healing process for my clients. Visit [VisionaryMusic.com](http://VisionaryMusic.com) for more info. A great place to begin working with our sound is by starting with our DNAvatar Program – download the free info packet to get started at [DNAvatar.com](http://DNAvatar.com).

Personal transformation requires the examination of many belief systems, perceptions of reality and the willingness to step way outside the known boxes of lack and limitation. The core of our shared existence is at the threshold of change and shifts are occurring rapidly. This transition will illuminate the way we interact with ourselves, family, friends and our environment as we move into a new, more expansive way of being.

To get started with me, we start with what I call the "Spiritual MRI" where we really take a full scan of your spiritual systems to see where you are at this time and what areas need focus on in order to move forward on your evolutionary journey. Once you complete the initial MRI, you can request follow up sessions of any kind. I am available for spiritual guidance which can assist you in working with the multi-dimensional soundscapes and assist you in holding focus

# Spiritual MRI

All the following readings/sessions are included in the MRI session. This session is \$350 with individual sessions being around \$75-\$125 each. For new clients, I suggest the MRI as a place to start as this will provide us with valuable insights into your entire bio-energetic field. We begin with a free consult to determine the best direction to start with.

## Chakra Portrait/Reading

- Learn about the current condition of your Chakra System (12 main chakras/7 front & 5 back)
- Utilizing the chakra system, learn how to become more self empowered

- Understand the personality traits connected to each chakra
- See how much energy you are receiving at each chakra
- Understand the interrelationship between the chakras and how it affects your personality development
- Monitor your spiritual development work with regular portraits
- Discover where potential problems may occur and how to clear them using your intention to move energy
- Learn how to charge your chakra system for more balance & centeredness
- Experience a powerful remote chakra balancing session that will leave you feeling empowered, balanced and highly charged

Using a 12 chakra system (higher chakras read for advanced clients) to read the status of the chakra energy system, a portrait is offered to help you understand where you are at this time on your evolutionary path. This is an excellent way to monitor your spiritual progress. Each successive portrait shows the results of the work you have done and where the next steps are for you in moving forward to attain higher states of balance and flow in your life.

## Pastlife Readings

- Uncover hidden talents and skills that may be dormant
- Accelerate your evolution by releasing the past

Going deep into core level pastlife imprints that create patterns in one's life that are repeated until awareness and understanding emerges is the focus of this type of reading. By learning how these threads of energy carry forth into our current lives, we can learn how to release, let go and forgive so we can move on with more strength and empowerment as we release these hidden fears.

By clairvoyantly viewing all the layers of your auric field, a graphic image is created to see what energetics you are working with and

operating from. Guidance is offered to help you work with these imprints for clearing and empowering your unfolding process. Imprints are viewed from layers 1 through 12 and beyond.

## Spiritual Guidance & Shamanic Journeying

Sometimes just sharing ideas and thoughts with a spiritual guide can help one to move through energy that might be stagnant or blocking one from moving along on the next step of the journey. Guidance is offered to understand more about the spiritual journey and how it relates to the events and situations in your daily life. These sessions move into an altered state of awareness which includes shamanically journeying into the many realms of your consciousness to discover lost or hidden knowledge about your life path. We use shamanic techniques as well as psychosynthesis to bring about release, cleansing and clearing away of any density. Working within a clients belief system and comfort zone is always a priority. These sessions can be done over phone or at the Odyssey Sound & Light Temple.

## DNA Activation

The sessions always include a level of the DNA Activation work using the multidimensional music from ShapeshifterDNA. This initiates all awakening codes for aligning with your divine purpose and higher mission work.
